

Plextek RFI

Graduate RF/Microwave Designer Engineer

Plextek RFI is an independent design house based near Cambridge in the UK. We specialise in the design and development of RFICs, MMICs and microwave/mm-wave modules. We are currently seeking to expand our very experienced design team with the addition of a graduate engineer with 2 to 5 years of design experience at RF/microwave frequencies. Experience of IC design is not essential as appropriate training will be provided.

Candidates should have a good understanding of transistor level RF design, s-parameters, the Smith Chart, microstrip circuit design, RF test/evaluation (s-parameters, power compression, IP3, NF).
