

PROJECT Manager (Driving IC ASSEMBLY and IC Packaging)

An international technical support interface between customers and assembly partners.

Location: Louvain (Leuven) , Belgium HQ. A combination of Home office and location offices Belgium / Netherlands is an option. Occasional travel mainly Europe.

Offer: Contracts include good salary package, cost and travelling allowance. Belgium and Dutch contractors (ZZP) for long term are invited too.

Presently we have a most interesting Semiconductor opening at a major client to bring their integrated circuits (chips) from prototype to production phase. You will deliver specialized technical advice and services on design level, assembly and test. You act as the technical support interface between international customers and assembly partners. The project management includes coordination and planning of package selection and package development.

Your Role:

In close cooperation with international sales, you take responsibility for the full project management including planning, package selection, package development of customer's integrated circuits:

- Discussing the ASIC prototype-to-production volume ramp plan with the customer;
- The definition and overall planning of the different project stages;
- Setting up the ASIC assembly with the assembly house and selecting the package type with the assemblyhouses;
- Organizing volume production (tape out) after the volume ramp phase. You propose cost improvement plans such as different packaging options together with the customer and assembly house;
- You attend regular training courses in order to master the newest technologies related to the most advanced packaging methods.

Profile

- You have a Master's degree and/or PHD in (IC) Electronics;
- Minimum of 5 years relevant experience (ASIC assembly);
- Strong in project-based work;
- Pro-active and sensitive attitude for diversity of international customers;
- You are familiar with Belgium working culture and can act upon;
- Some travelling mainly Europe is part of the job;
- Well developed English language skills (Dutch is pre);

We offer

Most challenging position at one of the most innovative global high-tech environment. Competitive salary or rate (Contractors) is offered added with cost allowances.
